

Adiponectin/ACRP30, Mouse

Cat.no. PK0181

Product size: 10ug 50ug 1mg

Source: E. coli

Species: Mouse

Biological Activity: ED50 < 5 µg/mL, measured by a cell growth inhibitory assay using M1 cells, corresponding to a specific activity of > 2 × 10² units/mg.

Molecular Weight: 24.6 kDa, observed by reducing SDS-PAGE.

Formulation: Lyophilized after extensive dialysis against 50 mM Tris, 150 mM NaCl, pH8.0.

Reconstitution: Reconstituted in ddH₂O or PBS at 100 µg/ml.

Purity: > 95% as analyzed by SDS-PAGE and HPLC.

Endotoxin Level: < 0.2 EU/µg, determined by LAL method.

Storage: Lyophilized recombinant mouse Adiponectin (rmAdiponectin) remains stable up to 6 months at lower than -70°C from date of receipt. Upon reconstitution, rmAdiponectin remains stable up to 2 weeks at 4°C or up to 3 months at -20°C.

Description: Adiponectin is a hormone mainly produced by adipocytes. Adiponectin forms a homotrimer and exists as higher order multimers in vivo. The receptors of Adiponectin are seven transmembrane G protein coupled receptors: Receptor 1 is expressed in skeletal muscle and Receptor 2 in liver. Adiponectin receives a lot of attention because of its anti-diabetic, anti-atherosclerotic, and anti-inflammatory properties. Adiponectin increases the expression of molecules involved in fatty acid transport, combustion of fatty acid, and energy dissipation, and increases insulin sensitivity of the body. Decreased levels of Adiponectin are associated with hypertension, cardiovascular diseases, and metabolic syndromes. Therefore, Adiponectin has promising potential as a pharmacological agent. Recombinant mouse Adiponectin (rmAdiponectin) produced in E. coli is a single non-glycosylated polypeptide chain containing 227 amino acids.
